Overview

Office of Research staff within the Research, Analysis and Statistics organization provides calendar year projections of information and withholding documents on an annual basis to accommodate more recent filing experience. These projections of Information Reporting Program (IRP) documents also incorporate current legislative and administrative initiatives, as well as relevant economic and demographic trends. Forecasts of economic/demographic data used to develop some of these information document projections were provided by Global Insight.

The information and withholding document projections contained within this publication are used primarily by the IRS operational and resource planning functions to assist in the formulation of their budget submissions and staffing requirements, and to complete various other analyses. Enacted tax law changes and confirmed administrative plans are reflected in these projections. However, legislative or administrative initiatives simply under consideration are generally not used to adjust the projections due to the uncertain nature of their eventual outcome.

A comparison of projections for filing year 2006 made in the 2004 version of this document versus the current update is contained in Table 1. This table compares both the “all media grand total” and “paper” components. Table 2 contains the U.S. level projections through calendar year (CY) 2013 for the grand total volumes for all media. The U.S. forecasts for the “non-paper” segment are provided in Table 3, while Table 4 presents the “paper” component. Detailed breakouts for the paper component at the IRS processing campus level are provided in Tables 4A through 4E.

The current alignment of states by IRS processing campus for paper Schedules K-1 is presented in Table 5, while Table 6 contains the current alignment of states by processing campus for the other paper documents. These current alignments are reflected in the campus level projections for the entire forecast horizon, although changes are likely to occur in the near future, because decisions on future campus consolidations were still pending at the time of publication. Following the alignment tables is additional narrative that provides definitions of the IRP forms projected, as well as the methodology used to forecast these items.

Impact of Recent Legislative and Administrative Changes

Changes and Additional IRP Documents Being Projected

The Medicare Prescription Drug, Improvement, and Modernization Act of 2003 created new Code section 223 that establishes health savings accounts (HSAs). Effective CY 2005, Forms 5498MSA and 1099MSA will be replaced by Forms 5498-SA and 1099-SA, Distributions from an HAS, Archer MSA or Medicare + Choice. Health Savings Accounts offer a greater tax preference and expanded eligibility relative to medical savings accounts. Based on input from Treasury’s Office of Tax Analysis, we expect a

much higher participation in the HSA's than we have historically seen in the MSA's. Hence, our 2006 estimate reflects a significant jump with a tapering trend for the later years.

We are also projecting two additional forms in this year's edition of IRS Document 6961. One of these is Form 1099-CAP, Changes in Corporate Control and Capital Structure, whereby corporations must file if control of the corporation was acquired or it underwent a substantial change in capital structure. The other is Form 1098C, Contributions of Motor Vehicles, Boats and Airplanes, which charitable organizations will be required to file for all donations of automobiles, boats and airplanes.

Revisions to 2006 Forecasts Relative to Forecasts Produced Last Year

For filing year (i.e., calendar year) 2006, the grand total number of information and withholding documents projected in this update is about 7.2 percent (115 million forms) lower than the total volume projected last year (see Table 1, left side). A major portion of the net revision is driven by the decrease in the projections of Forms 1099-B (i.e., 71 million fewer) and Forms 1099-INT (i.e., 20.5 million fewer). These downward revisions are in response to the actual 2004 filing experience.

Regarding paper submissions, the number of documents projected for CY 2006 is about 1.7 percent (i.e., 1.0 million forms) less than the paper volume projected in last year's edition of this document (Table 1, right side). Embedded in this net change in CY 2006 paper volumes is a decrease of approximately 3.6 million in the forecast of paper Form 1098T, again in response to the actual 2004 filing experience.

Customer Satisfaction Measures

As part of our commitment to performance measurement, the Projections & Forecasting Group conducts an annual survey of IRS customers to measure and report satisfaction levels with our projection products and services. The following table summarizes the results of those surveys on five major dimensions.

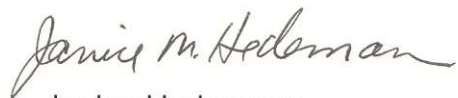

Projections & Forecasting Group Customer Satisfaction Survey Result*

<u>Measure</u>	Percent "Somewhat Satisfied" thru "Totally Satisfied"						Percent "Totally Satisfied"

** In 2004, the rating scale on the Projections & Forecasting Group customer satisfaction survey was changed to conform to the standard used for all offices within Research, Analysis and Statistics. Data were configured above to provide both a comparable historical trend, plus information on the newer "totally satisfied" demarcation.*

Statement of Methodology

Three major sets of projections are included in this document. The first group (Table 2) contains all media grand total projections for withholding and other Information Reporting Documents (IRP) documents received by IRS. Table 3 contains the second set of projections, which includes the non-paper portion (non-paper includes magnetic tape filing, electronic filing, and diskette filing). The third group, found in Table 4, includes only the paper portion of the projections. In compliance with customer requests, forecasts are provided at the U.S. level, while projections of paper documents are available for both the U.S. and IRS processing campus levels (Tables 4A-4E), with the exception of Currency Transaction Reports (which are all processed by the Detroit Computing Center).

Data Sources and 2004 Historical Paper Volumes

Actual (historical) data on the volume of IRP documents filed are provided by program staff under the operating divisions and Information Technology Services. Data sources include: MCC IRP Reformat Report, CAWR W-2 Control Report, IRP Counts for 1099-SSA/RRB, Paper IRP Production Report, other campus sources, and the national calendar year Currency Transaction Report receipts. Counts for Forms 1042-S were provided by relevant program staff. Most of the paper form types filed in calendar year (CY) 2004 were fully counted by IRS staff within the processing campuses with the exceptions of Forms 1098, 1099LTC, 1099C, 1099-INT, Foreign and 1099-S. In these instances, volumes for CY 2004 were estimated by Research staff via time trend extrapolations of prior history.

U.S. Level Forecasts

The U.S. level grand total (all media) paper projections were forecasted through a combination of time series extrapolations and regression analysis. Each form type was forecasted separately. In some instances, regression models were developed using appropriate economic/demographic variables. In other instances, forecasts for grand total volumes were built from historic time trends. Several variables used in the regression models included payroll employment, population counts, and money supply. Time trend models were used to forecast the paper IRP document volumes, again by form type. The projections of IRP non-paper documents were then derived by subtracting projections of the IRP paper documents from the grand total projections.

The above procedure was used for all documents with a few exceptions. For Form 1096, Form 8300, and FinCen 103 (formerly form 8362/8852), paper is the only accepted transmittal format. Therefore, for these form types, the grand total and paper volumes were the same.

Campus Level Forecasts and Impact of Modernization Alignment

The Service Center Recognition/Imaging Processing System (SCRIPS) enables IRS campuses to optically scan most paper IRP documents. As a result, the IRS

consolidated the filing/processing of these forms into four designated “SCRIPS” sites in CY 2004. Most paper documents were processed at the Austin, Cincinnati, Kansas City, and Ogden campuses. However, the paper Schedule K-1 series documents are handled exclusively by the Cincinnati and Ogden campuses, with the exception of forms submitted from the International area which are still processed by the Philadelphia campus. Form 1042-S and foreign paper submissions are also processed at the campus in Philadelphia.

The campus level forecasts were derived based on their relative shares of the U.S. totals in CY 2004, by applicable form type. These shares were held constant throughout the forecast horizon through 2013. In addition, all paper Currency Transaction Reports continue to be handled at the Detroit Computing Campus. Thus, campus level forecasts are not applicable.

Table 5 reflects the current processing campus alignment of states/international for paper Schedules K-1. Table 6 shows the current alignment of states/international by processing campus for all other paper documents.
